

PALMYRA EWES (LOCATED AT GOOLGOWI, NSW)

550 classed 1st X Merino/ SAMP Ewes, April/May 2015 drop.

These young Ewes exhibit a very sound and successful breeding future, they are from highly sort after large frame SA Merino Ewes by locally bred Warburn SAMP rams. They currently average 61kg after a 24 hour curfew and are in a forward to medium store condition. They are a medium to large frame Ewe that will no doubt develop into magnificent sheep. An estimated 50% of Ewes did lamb down and had lambs weaned at shearing.

They have been drenched with Ivomec on the 24/10/2016, jetted with Coopers Assassin/ Pro Guard on the 24/10/16, Ewe Guard on the 15/2/2016 and 6 in 1 at weaning.

These Ewes were August shorn with 10 months wool, and tested 21.6 micron with a 65% yield.

They are mulsed and are estimated to have a current wool length of 6-13mm. They exhibit very little seed and burr but the odd Ewe does have some clover burr on bellies.

The vendor is frequently topping the Griffith market, with their fat lambs topping in 2016 at \$230.

Vendor comment: "A good line of young Ewes ready for a lucrative breeding future".

Agents comment: "These young Ewes are highly recommended and will not disappoint, these particular Ewes would be an asset for anyone ready to introduce them into their breeding program.

Asking Price: \$230 + GST neg. Additional photos & video available on request.
